Results-oriented **SDET (Software Development Engineer in Test)** with **5.6 years** of hands-on experience in software testing, automation, and quality assurance. Proficient in designing and implementing robust test automation frameworks, developing and executing comprehensive test plans, and identifying and documenting defects. Experienced in collaborating with cross-functional teams to ensure the delivery of high-quality, reliable software products. Seeking to leverage my technical and analytical skills in a challenging SDET role to drive innovation, improve testing efficiency, and enhance overall product quality.
